

## Band-Info

# **FOLLOW THE CAT**

Let's go back to the 70s and 80s....

The genre of art rock or progressive rock has its heyday , bands like Alan Parsons project, Toto, Foreigner or Marillion bring epic concept albums on the market, fill halls and stadiums and play live at the highest musical level. Until today they inspire numerous lovers of this music style.

FOLLOW THE CAT move on these paths, telling the stories of two cats with catchy melodies, extraordinary harmony sequences and elaborate arrangements - completely in the spirit of the concept albums of their musical idols. The main focus is on the high-quality guitar work and the polyphonic choral singing.

Similar to the musical, various episodes from the lives of the old cat and the young tomcat are musically and lyrically implemented so that you can dive into the world of these loving beings....

....also "follows the cat"!
