シ ヅ ラ

Raised by the leaders of the second wave of Nu-Metal and nurtured by the highly faceted J-Rock, german youngsters SHIZZURA will prove to be a good child with a series of three single-releases

WHITE - 21.10.2012

VERMILLION - 01.03.2013

ONYX - 25.10.2013

Each single features SHIZZURAs own unique blend of vocals oscillating between angst-ridden sadness and aggressive baying, downtuned guitars and a drumming ranging from punk-induced simplicity to fast-paced, heavy rhythms.

Paying tribute to their musical mentors, SHIZZURA not only sing in english but also in japanese, giving their compositions that slight little extra which puts them a-head above the rest of the residual german underground.
