

# WHITEHOUSE - Biography

## About

*"This blend of Rock, Latin and Pop is for you if you crave an adrenaline rush with a touch of class. Feel the edge and the fusion of styles that makes "The Whitehouse Sound" unique!"*

**The** U.S. band WHITEHOUSE appears with a blend of English and Spanish lyricism and with a unique blend of influences crossing over classical, pop-rock, and classic rock styles.

**Although** they are no strangers to worldwide publicity (a variety of music publications and air-play around the world), they have taken more affirmative action by securing a television spot with "The Shield".

**The Shield** is played on the FX network in the US and other networks Internationally. The show has received wide recognition for its controversial portrayal of corruption in the Los Angeles police department. With several Emmy nominations, and the contributions of extended roles from notable film actors such as *Glenn Close* and *Forest Whitaker*, it provided a great publicity opportunity for the band.

**For** their new single **Gonna Make It Up To You** they had Grammy winning producer **Randy Miller** (*La Maffia, Marc Anthony, Beyoncé*) on board. The supporting harmonies are sung by Pop and Jazz singer **Sandy Stewart**.

**Artist License:** GEMA 844 823

## Members and Contact

***José Amigo***

lead vocals,guitars,keys

***Stephan Simon***

lead & acoustic guitars,vocals

***Jerry Loeffler***

basses,vocals
