BIO

The Berlin based band FLORIGIN began their music project in 2019. Starting as a duo, founders Khoa (guitar/bass/synths) and Alina (vocals/guitar/synths) started making music from their living room, releasing several singles and the EP Loopy Patterns. Ready to focus on their live sound, they found Pip (drums/backing vocals) in early 2023, refreshing old songs, writing new ones together. With musical elements from australian psych-rock, as well as Indie and Post-Punk, FLORIGIN formed their own sound. 2024 the band gained a lot of stage experience playing fun shows in small bars in Berlin. In September 2024 Eren (bass) joined the band. Plans for 2025 are already set: The band sails to a new year with their new EP onboard, as well as their wild and fun setlist to play another year full of gigs!
