Revolt Poetry

This is - right now - our time
Rise up - rise up - Revolt

Conform and under their spell
Controlled with money and fear
Antisocial heads of state
Distracts with mendacity

Realize who you are
Punish with prudent words
Intent movement
Get on your feet, out on the street

Comfortable to ignore
Annoying facts
Solve the problems of this world
With inhuman acts
Religions divide us all
Conventions are chains
Their bias paralyses
A strategy of tension

War on palaces
No more slave-loyality

Weltenbrand

A dying time, a storm without a cloud
A last farewell, a last laugh for a long time
A threat raises from the inside out
A world in black and white
Screams, which break the marrow
Destroy your self-hate with a bomb
An act of homegrown terror
Souls at half-staff, cruel and calm

You wanna change society with flames – Weltenbrand
A worldview without viewing the world – Weltenbrand
Attention for a broken self-esteem - Weltenbrand
Collective love strikes down your hate – Weltenbrand

Self-appointed savior, loser, coward
You will never win

Many worlds unhinged in a little while
From relatives to bereaved
Guilty to be alive
So much empty nurseries
Trauma eats up many lives
Shadows of themselves
Memorial addresses sweep over
Calm starts with intolerableness

Allies

Modern society
A rotten system of values
Inveterate prejudgments
Force them to live a life in shadows

We are allies, to fight for a consent culture
We are allies, for thinking in diversity
We are allies, against privileges
We are allies, we don't give a shit about norms

Queer phobia
Stencils in mind
Indignity deride
Human aspects denied
Rape culture downplayed
Misogyny, blaming the victims
Disregard makes you
Being a part of this system

We all are freaks
Marvelous and unique
Coming out for what?
It's none of your business

The bride of fire

A custom decayed
Modern slavery
Married murderer
Patriarchal motives
Endless greed, not calmed down
Weeks of torture begin

Tradition – Dowry – Tribunal - Femicide
We want to see blood

Inevitable accident
Has become the norm
Cheap kerosene
A bundle of ashes
Endless greed, not calmed down
Then she burns, burns, burns,
The bride of fire, the bride of fire

Own fault of being female
Depersonalized
Demographic final solution
Impunity space
Endless greed, not calmed down
Collapse of society

We want to see blood

Violence pays off again

Stave whoever cross their way
Motiveless hatchery of violence
Brain them cause of bad mood
Cold eyes, endorsed by boredom
Multiple offender on parole
Brutality brings the fame
Every detention, a trophy
Unconscious at aggressors' mercy

Child abuser, legally insane
Human life is not worth
Quantum leap of cruelty
Under cloudy eyes of justice
Searching for leniency
Ductile principle of legality
Overloaded authorities
Judgment arrested

Luxury penthouse prison suite
A reward for what they've done
For the victim's ordeal goes on
Violence pays off again
Criminogenic whitewash
Not annoyed by investigations
Offender protection, suspended sentence
Violence pays off again

One thought

When freedom is only hackneyed saying
When the dark triad is the standard
When armament abandons science
When schools explode ‘cause they are a threat
Then let your words become the collapse of the system

We early learn to hate
A history of transmitted violence
Don’t obey, take action
No bullet can bring the silence

One child, one mentor, can break the sword
One dream, one thought, can be heard
One pen, one book, can change the world
Make your life, make your life a lection

This is Kairos

Satyagraha in our hearts
Ahimsa in our minds
Don’t fight them, open their eyes
Bridges over abysses that divides
Let your words become murder on the system

MONSTAnto

Feeding the monster, which haunts us
Engineering of genetics
Leaving green wastelands behind
A world full of guinea pigs
Infested ghost planet
Biological warfare
Living poison reservoirs
Transgenic authorities
Subdue nature‘s laws
Whistleblowers silenced

Refrain:
Traders of death
Scourge of mankind
Suicide seed
Future sacrifice

Conscious dispossession of life
Hunger as a weapon
Delivered by companies
Genetic Roulette
Infested ghost planet
Biological warfare
Living poison reservoirs
Transgenic authorities
Subdue nature‘s laws
Whistleblowers silenced

Odyssee

Only a hap, where we were born
We heard the bombs, destroyed our home
We left the shattered bodies of our children
Human being on a dying continent

Ethnical cleansing, they consign ruins and fire
A painful way into an uncertain future
Now we are existences on a banknote
We drown where you go on vacation

They’ve took our last bit of nil – Odyssee
Where should we go on our search for life – Odyssee

We live with nothing, but bear everything
No paradise for us, prejudice to bogeyman
Your fear calls us internally displaced persons
The war against us goes on and on and on

Power to the youth

Self-appointed experts fuck our joint mother earth
They wanna lead you right at birth
They take us into the tomb
Too old to go through the upcoming doom
They fail with all decisions the lobbies choose
With greed and disregard, a global abuse
They defy every human right
Affluence with spite

They create their own truth
Power to the youth
Stand against their fake news
Power to the youth

Fear and submission for the benefit of childhood
They wanna silence us to be secured
They despise starry eyed idealists
Cause they fear the loss of their exploitative habits

You can change everything
Take your head out of their sling
With anger and intellect
Vouch for change and act

We don't deserve this world

So sad how stupid we are
Selfish, lazy and ignorant
Cynical we ruin this earth
We're all going down indifferent
Crowd the earth and subdue it
Bring on the next mass mortality
Plunder, rape and kill, devour this plastic wreck
Imperialistic suicide

Earth bleeds out
Watch us fail

We don't deserve this world

No reliance on politics
Deafening silence
Greedy and inept examples
Build the opposite alliance
A planet at the gallows
Two minutes after midnight
Not the crown of evolution
But our own executioner worldwide

Earth bleeds out
We have failed
