

QUANTUM.
ENERGETIC. LIMITLESS. RAW.

BIOGRAPHY

QUANTUM is all about emotions. Energetic, limitless and raw. You can't pigeonhole QUANTUM, that's a good thing. Not the genre but the listener's experience is the main focus. The band wildly combines musical styles from Electro through to Metal and Hip Hop. If you are into Bring me the Horizon, Linkin Park, MUSE or Yungblud, you'll love QUANTUM.

Spurred on by the 3rd place, out of over 100 participating bands, at the SPH Music Masters as well as the unforgettable concert series 2019/20, the band made creative use of the Corona standstill. Together with sound engineers and producers Claudio Cueni (2Pac, little Simz) and Tommy Vetterli (Eluveitie, Coroner), the five youngsters produced five singles, which will be released in the course of 2021/22.

The songs of QUANTUM are about joie de vivre and optimism in a world in which it is becoming increasingly difficult to find one's own place. "We are a motley crew that has managed to function. This is what has happened to our music as well, it has become versatile, modern, while the roots remain unmistakable", Kay Mangold, drummer.

A QUANTUM concert is like swallowing a whole bunch of caterpillars only to let your own fireworks explode full of butterflies and love. Anyone is welcome. The more colorful the better. Cheers to diversity. Cheers to life. Cheers to music.
