

Press release Burning Amp

“Burning Amp” hard rock and metal from Hessen

Like a river, the guitars make their way through the baseline of bass and drums and merge with the vocals to form a unity. Past and present unite to create a unique world of sound. Sometimes hard and fast like a cannonball and sometimes soft and soulful like a romantic sunset.

By bringing together the rock of the 80s and 90s and an interesting combination of today's modern metal, the band Burning Amp has succeeded in creating its own unmistakable sound. Formed in 2011, the quartet has released 2 albums so far and have caused a stir worldwide with interviews, airplay on radio stations and positive reviews from specialist magazines.

“This is exactly the music that everyone wants to hear!” you hear at the concerts. “Classic rock music in a modern guise” headlines the newspapers.

This simply positive response has made the band Burning Amp, consisting of: Ralf Lenz, Christian Löer, Brian Lenz and Johannes Lang, are encouraged to continue and are already really burning to win the hearts of their listeners.
