13	Floortom	Sennheiser MD421	
14	Overhead left	AKG C391	
14	Overhead right	AKG C391	

## Please provide:

- Drum riser
- 2x microphone stand for vocals
- all microphones mentioned above (equal microphones are fine) with cables
- sockets front left
- sockets front right
- sockets front center
- sockets Drums

## Sound Setup

- The male vocals are sung low and deep. They need strong compression to be in the focus. Turn loud!
- The female vocals are more of a background element
- Bass guitar shall be at an equal volume as both guitars
- We prefer a soft and warm drum sound. Not too punchy!
- Don't forget about the sampler, which replaces the keyboard ;-)
