Dear Sound Technician!

Thank you for taking on mixing responsibilities for this band. Here's a quick run-through:

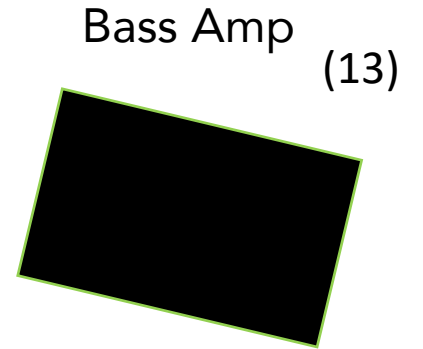

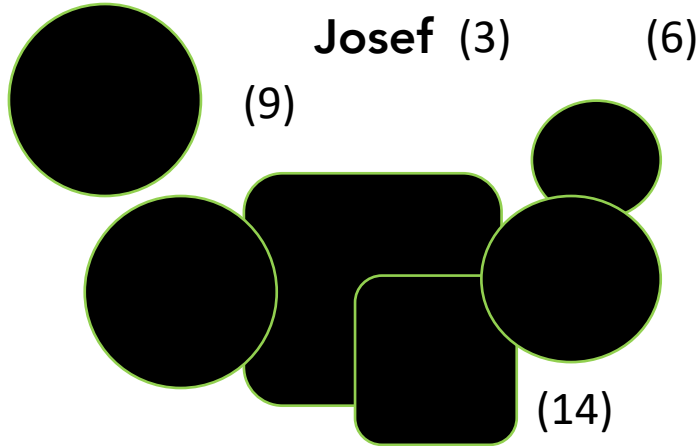

- The band:
 - + Electric guitar and lead vocals: Dominik (1)
 - + Bass and backing vocals: Oliver (2)
 - + Drums and backing vocals: Josef (3)
- No instrument changes during the set (except for technical issues)
- One monitor per instrument would be perfect, meaning 3 in total (4, 5, 6)
- We need one vocal mic each
 - + Guitarist is lead singer (7)
 - + Bass and drum mic (8, 9) (backing vocals) should together be about as loud as lead vocals (they usually sing together)
- We need one regular power output for the pedalboards for guitar (10) and bass (11) which should be accessible directly at the microphone stands
- Our guitarist Dominik plays through a Fender Bassbreaker 15 top with a 1x12 cabinet (12)
- Our bass player Oliver plays through an Orange top with a 2x12 cabinet (13)
- Our drummer Josef plays an acoustic drum-set (14) consisting of 1xKick, 1xSnare, 1xHi-Hat, 1xCowbell, 1xFloor Tom, 1xMid Tom, 1xRide, 2xCrash, 1xChina
