GIANTS DWARFS AND BLACK HOLES

GIANTS DWARFS AND BLACK HOLES is a **heavy psych acid prog rock** band from Germany, whose sound is a unique blend of 70s heavy psychedelic, acid, jam, blues, kraut and progressive rock stretching across the musical universe into the present day. The formation was founded in 2019 by Tomasz Riedel (composition, guitar, bass) and Carsten Freckmann (drums). After a few line-up changes, Christiane Thomaßen (vocals) joined in 2023, followed by Eckhardt Keim (bass, keys) in June 2025. Finally, in October 2026, Sebastian Fritz took over the position of drummer.

The band name grew out of a playful idea. On the one hand, it refers to astronomical terms—giants (red giants), dwarfs (white dwarfs), and black holes—while on the other hand, it is meant as a play on words for creatures from fairy tales and mythology. The fairytale-astronomical ambiguity of the name is intentional and invites you on a personal journey of the imagination.
