

JOIX - Biography

Joerg Jochims aka **JOIX** was born in Berlin in 1977.

He moved to a village near Heidelberg at the tender age of three.

It was in the early 90s when he heard the first sets from DJs of the upcoming techno scene at hr3's Saturday nights Radioshow Clubnight. He was captured by this new world of sounds. This attraction made him finally start off with the creation of his own electronic sounds in **1996**.

This was the beginning of his career as producer and liveact of electronic music.

JOIX who is now based at the industrial town Mannheim, collected experience as liveact when was part of "**Der 7. Weg**".

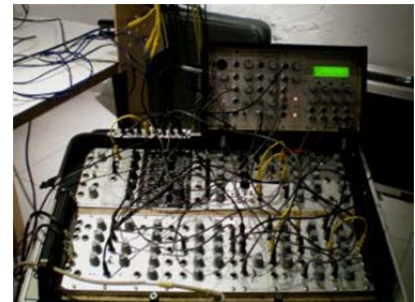

From **1997 till 2003** he performed live at Clubs like the Tresor in Berlin, festivals like Harlequins Castle and on radio stations like Evosonic.

All this led to the release of diverse performances published on vinyl as well as CD.

Since 2009 Joerg runs his own private **home studio** in Mannheim under the name "**JOIX**".

His sound is mainly influenced by electronic music from Detroit, Berlin and Frankfurt.

Characteristic for his deep and impulsive Techno are phat bass lines, strange soundscapes and drifty beats. The deepness of his tracks unfolds its effect mainly on the dark dance floor, but is complex enough to be thrilling on your home hi-fi as well. JOIX generates most of the sounds on his **analog-modular-synthesizer**. This combined with the absence of any bought sample libraries or presets, confronts the listener with an extraordinary, overwhelming and unusual interpretation of electronic music. The audible and perceptible presence of analog sounds is the key to JOIX's music. This is expressed by voluminous, wide, powerful and embracing sounds which are often differentiated and warm at the same time. Distinctive subliminal random effects are creating unique live-lines due to irregular voltage levels inside the analog technical equipment.

The best way to come in touch with his music is to hear and feel him perform live on stage.

As a **liveact** with more than 15 years of live experiences, JOIX is able to create deep and powerful vibes on the dance floor.

His live gear consists of **analog sound modules**, keyboards and laptops. That gives him the ability to make very experimental sounds as well as functional club music. Like a DJ he can change his music program "on the fly" to adapt to the local situation and the crowd.

The newest element included in his performance is a **didgeridoo** applied to his analog equipment. This strong combination of digital, analog and acoustic sounds will take the people on a very special journey to the deepest worlds of electronic dance music.
