- UNSIGNED -

Abandoned Humanity is a metal band with lots of influences – we’ve been mixing up the intense sounds of Progressive Death and Groove Metal with whatever else catches our ear – from Post Rock to Black Metal. Our debut album, *Against all Odds*, was one hell of a journey. Crafted between 2018 and 2021, we poured our hearts into these songs, not realizing they’d echo the coming chaos of the world outside.

The music we made in our homes has somehow captured the anxiety we all felt as the world began to shift beneath our feet. The dread and uncertainty of those days? They found their way into our riffs and lyrics, whether we meant it or not. The soundtrack to our struggles have always been the heavy hitters like Death and Nevermore, and the innovative bands like Gojira, Ihsahn and Alcest. Now we hope to be part of yours.

Formed in Moscow by Denis and Artem, who connected over a shared passion for metal, the band has navigated challenges, including distance, with Denis now living in Germany and Artem in Spain. We’ve stayed united through music, and with guitar player Roman Soldatov and drummer Mathis Ernst joining us, we’re ready to go back on stage.

Dive into ‘*Against All Odds*’ and join us in this ride. We made it for ourselves, but it’s out there for all of you. Let’s face the madness of the world together, one riff at a time.
