

“William Bleak write songs as if recalling the most traumatic night of their lives and all of the bad decisions that got them there. “ -alt77

“Their music—a fusion of electronic beats, frenetic guitar strums, and deep basslines—creates a sound that is as grotesque as it is celebratory, mirroring the complex emotional landscapes of their namesake.” -post-punk.com

William Bleak is a Post Punk/Cold Wave Band from Berlin, Germany, combining pumping electronic rhythms with manic guitars and guttural baselines into a grotesque yet celebratory sound.

Once a Post Punk three piece which played dreamy, melancholic Rock inspired by half remembered memories, they have since rapidly evolved in favour of a bold, cold and heavy sound more directly inspired by the harsh winters of Berlin.

In 2024 alone the band released six well-received singles, four accompanying music videos, embarked on a successful DIY US tour and opened for bands like Traitors and Clan of Xymox.

Their new sound serves as the perfect fusion of Dance Punk Sensibilities and Cold Wave Despair, a jarring synthesis lethal to the senses.
