

like_patterns

emotive hardcore | post-metal

Founded in 2022 near Stuttgart, Germany, **like_patterns** have constantly searched for a musical style that suits their members own likings. Having played in various bands throughout the 2000s their influences stem from different parts of the musical styles through these years.

From punkrock, screamo, post-hardcore to death metal and modern metal, they fuse all these influences into their sound to create something unusual and out of the ordinary.

like_patterns consists of two guitars, one bass and drums. There is no main vocalist as the two guitarists share their lyrics.

The first step into this world as a band is their first 2-track EP, which was recorded in early 2024 at Harddrive Sounds Studio in Stuttgart.

To spread their music onto this planet, they are looking for **shows to play**. If desired, they can provide a full set up to 50min of playtime plus full backline.

Please check their songs online,
and hit them up via their socials shown below.

like_patterns is
Jan | Basti | Holger | Jansen
