ABOUT

HERSTORY: A NEW VOICE IN WORLD BLUES

Take the sweeping drama of 1970s Beirut cabaret, swirl it with melodies reminiscent of the Australian landscape and anoint it in biblical-inspired blues, and you'll get close to Emily Davis' sound.

Cinematic, elemental and centred on the female voice, Davis creates lush worlds where love, death and sex collide with beauty, darkness and hope. Inspired by Fairuz, Stevie Nicks, Kate Bush and Fiona Apple, her songwriting draws on femininity, feminism and the herstory of women making music.

Her Lebanese heritage, the vast Australian landscape and the raw storytelling tradition of blues form the foundations of a sound that refuses easy categorisation.

Across three critically acclaimed albums, Davis has toured extensively throughout Australia and Europe, performing at festivals including WOMADelaide, Breminale and Rudolstadt. Now, as she prepares her fourth studio album, those threads are converging. Darker, more expansive and more assured, Davis is pushing world blues into new territory.
