Biography

GAZTREA is a modern metal band from Hamburg, Germany, active since 2018. Known for their cinematic blend of metalcore, electronic-rock, and visual kei-inspired aesthetics, the band delivers a sound that is both crushing and deeply emotional. Taking cues from acts like Motionless in White, Loathe, and Dir En Grey, GAZTREA blends brutal riffing, atmospheric textures, and a visual concept that enhances their sonic identity.

After making waves with their 2023 album "Celestia", GAZTREA is preparing to unleash their next chapter: the upcoming EP "All is Dust", set for release in late 2025. The EP promises to explore darker lyrical themes—loss, decay, and transcendence—through a more experimental and cinematic soundscape.

With their intense live performances and growing discography, GAZTREA continues to establish themselves as a force within the European modern metal scene and beyond.
