XY is an **alternative metal** band that was formed at the end of 2006 in the French Riviera, influenced by bands such as Linkin Park, Avenged Sevenfold, Bring me the Horizon, Slipknot, Pendulum and 30 Seconds to Mars.

After releasing 2 albums ("Another Me" and "Flying") and a live DVD, they were nominated for the "**Hollywood Music in Media Awards**" in November of 2011 with the song "I Miss You". Meanwhile, their song "Superficial" has been added to the video game "Rock Band 3".

The band began to distribute their music worldwide with the help of Youtube. To date, XY has registered more than **30 000 followers** and obtained over **4 million views**. They are also famous for their cover songs of some of American's most recognized bands, mainly from **Avenged Sevenfold**, whom they met in Paris but also for their rock/metal remix covers like Lady Gaga's single "Applause" that she shared herself on her personal social networks increasing the buzz for the band. In addition, the band regularly plays at home and abroad (Germany, Sweden, Italy), in March of 2013 they made their American debut in Los Angeles, at the world famous "**Whisky a Go-Go**" where some of the biggest names in rock started (Guns n Roses, Rage Against the Machine, ...).

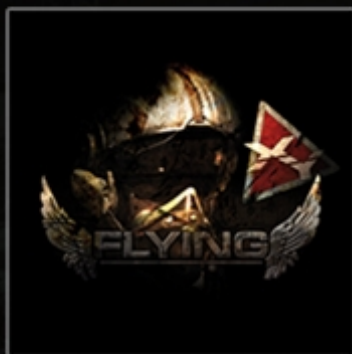

Giving more and more energy while playing live and following their primary tastes, they decided to move to the opposite way most bands go, XY went more into metal.

Their 3rd album "Memories / Now / Dreams" was released in April 2014 and they went on **tour** in May in the **USA** for 8 gigs.

ANOTHER ME (2010)

P R E S S MEMORIES / NOW / DREAMS

Spirit of Metal (17/20):

"Because anyone would enjoy listening to this album. Bringing new things, experimenting, sometimes with more old-school influences, near from Linkin Park (in their first albums), Avenged Sevenfold, 30 Seconds to Mars, the band, after 2 alternative rock albums, now plays a mix between Nu Metal, Industrial Metal, Electro Metal and even some Cyber Metal. [...]"

The album is between what you can like when you listen to it for the first time and the time bomb that will become more interesting as you listen to it several times. «Deathbat» and «One Last Stand» will do both, catching you instantly and making you want to listen to them over and over again. The irreproachable production (what a job on the vocals!) is a very noticeable point. If an XY album should make them become big, this is gonna be this one, considering the huge evolution between the previous ones, in a creative way as much as in the quest to find their own identity."

La Grosse Radio (8/10):

"XY released what seemed to be an album that will change their career, which is going to lead them toward national and international recognition. Let's be clear, this album is very good and deserves exposure because it can be appreciated by most rock/metal lovers. [...]"

To conclude, an album that should be heard at least once and a band that deserves more. Too bad it's easier for them to tour the US than playing in France, their own country."

French Metal (15.5/20):

"Memories / Now / Dreams is XY's most accomplished, powerful, complete album [...] showing that being french can go with musical quality. The album sounds american with songs that have nothing to envy to their glorious influences. Those songs are very well written. The production is very good and an obvious science of arrangements and melodies completes the whole thing."

Knoxville - By far one of the loudest crowds on this tour. We noticed members of the band **XY** were in the crowd tonight from France. There is a song on their new CD dedicated to us called Deathbat! Check it out.

«XY produce a very well mastered and accomplished alternative rock.»

Music in Belgium: (4/5)

«[...] songs that are made to become hits.»

"I wondered why France had produced so few memorable rock bands and whether there were any bands that could change things, I think XY may be the one."

«It's a good album [...] who knows where their next one will take them»

«Another me», their 1st album [...] shows an artistic maturity whether in the design or in the music (sound, writing). William's voice perfectly alternates between power and softness.

«Another Me» has the biggest radio potential I've heard in a while.

Their songs have this typical american sound with a simple and efficient structure that gets into your head as soon as you hear it.
