Info band & latest release (engl.):

RAY TEMPLE (est. 2016) The five men formed this band with astonishing rumbling drums, a dark and shiny voice, a leading fingerlickin' licks guitar, another guitar which follows and also gives some riffy chords and weird tones, and a bass, which may blow your mind (or makes you dance on the rooftop of your neighbours house). And that's all what really is needed to express their musical passion that leads straight towards your rock and roll-happiness. This is made for you, man!

Latest Release (7" Vinyl Single + Digital Download / Dec, 2017): After recording some songs in January 2017 the first physical output is the Double-A-Vinyl-Single GALAKTIKA / MANUKA HONEY which was released in December 2017

We're talking about a Double-A-Sided classic black 7" vinyl... with two killer Songs by the new band called "RAY TEMPLE"

Exclusive Artwork and even more exclusive Rock and Roll-Songwriting and playing is waiting for you to be discovered.

Side A: Galaktika

Other side: Manuka Honey

Release date: December 2017 recorded & mixed by the great Sasha Sirovica @ [Nota Falsa](#), mastered by Robert Babicz @ RB Mastering

Cover Design by Andi Thissen, Label Design by Christian Schmalohr
