What we need:

- 1 Mic Stand
- 4x EU Powersupply (3 Sockets each would be nice)
- Water with and without Gas, towels

How we work:

- Our complete signals will be routed through our splitter to your onstage Multicore for the FOH (7x XLR - 1x Bassdrum Trigger, 2 Git, 1 Bass, 2 Vox, 1 Sample)
- Normally we don't mic the drums aside from the Bassdrumtriggers ourselves cause we don't need for our inEar Monitoring

Additional Info:

- We use one Wireless Mic and Wireless Transmitters for the Bass and Guitar in combination with wireless inEar. If needed we can provide the frequencies use
- As we love to use every inch of the stage available we try to have as much space as possible - If stationary monitoring is used for other bands, it would be good if that is easy to remove for our set (If not - no problem! We try to not wreck anything :))
