 - 1x trombone
 - 1x bass drum trigger system

Please note that this description shows you all technical things we would like to have at each concert. We know that only a very few clubs have stuff like monitors or cabinets locally and some things every band brings along. For this reason it's important to talk about technical things some weeks before a concert. So that we know which equipment we have to take with us, which equipment you have locally and maybe which equipment another band brings along.

[Some technic points are red marked. It means that we always bring it along.]
