

EUTHYMIA

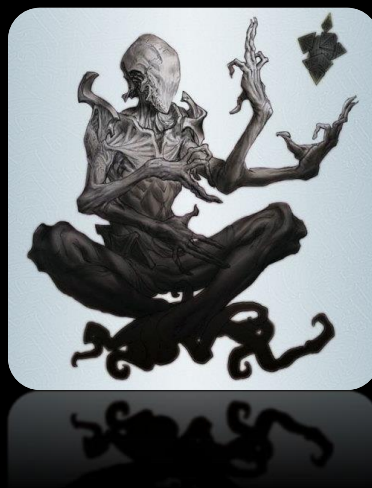

MADE TO DESTROY, BORN TO CREATE....

<< in addition to talking about music, we should talk about emotions, because at the center of the ambitious investigation undertaken by the band is the most perfect union of the most distant opposites, that is, the human being, with his pains, his joys, its potential and its weaknesses >>

founded in 2022 by Vito Tambasco (singer), Edoardo Di Vietri (lead guitar), Valentin Bernard (bass), Michael Veneri (lead guitar) and Matteo De Marco (synths and guitar), Euthymia want to represent with their music, in relationship with the intimacy and with the world around them, the perpetual and dynamic connection with an inner and outer universe that changes incessantly with the human being, tending to the unity of essence and knowledge.

This representation is nourished by esoteric lyrics, Jungian psychology, psychoanalysis, and astronomy, and is expressed mostly using sounds, aesthetics and structures related to metal and progressive rock deriving from bands such as Tool, A Perfect Circle and Sunn O)).

THE BAND
