

MONOHAZE

MONOHAZE stands for uncompromising sonic power and absolute freedom of performance. Founded in 2023 by Christian Wosimski and Justus Wilcken, the project merges raw energy with musical depth - no comping, no autotune, no safety net.

Both musicians are multi-instrumentalists with diverse artistic backgrounds. Christian spent over a decade as a member of the band Bitune, while Justus has been active for more than eight years as a composer and opera singer. As experienced studio musicians, they initially developed MONOHAZE as a creative counterdraft. Today, it has evolved into a project with a distinct and unmistakable artistic identity.

Following the release of their self-titled debut album, MONOHAZE brings its sound to where it fully unfolds: the stage. Performed without click tracks, with real amps and complete freedom in form and dynamics, the live shows are intense, direct, and unpredictable. They are capturing the atmosphere of the studio recordings and pushing it even further.

Christian and Justus are joined by Hamburg-based musicians Eliza Schinner (bass) and Paul Wrettom (drums). In autumn 2025, MONOHAZE took shape as a full band for the first time. With this new lineup, the project has developed a clear live identity: more direct, more organic, and more uncompromising than ever before.
